Our Discipline of [Business Information Systems](#) is a beacon of innovation and influence in the field, internationally recognised for our high-impact research, industry engagement, and analytical thinking in digital business. We are leaders in business education, offering a modern cutting-edge digital business curriculum for our outstanding student body, including post-experience and executive audiences. We are at the forefront of developing micro-credentials and lifelong learning opportunities in line with the University of Sydney Business School's purpose driven [Strategy 2023-27](#). Our graduates are highly valued by industry, professional services, government, and third-sector organisations.

We have broad and deep connections with universities worldwide and regularly host leading international scholars. The Discipline's colleagues are engaged in topics such as digital transformation, artificial intelligence, data science, cybersecurity, digital health, the future of work, and information technology for development. Our research is published in all leading journals in the field, including MIS Quarterly, Information Systems Research, Journal of the AIS, Organization Science, and more. Many of our faculty hold important editorial roles in highly regarded journals such as the Journal of the AIS, the Journal of Information Technology, and the Journal of Strategic Information Systems.

With the introduction of the new University of Sydney Enterprise Agreement 2023-26, the University has committed to establishing and advertising new continuing education focused academic positions. These positions are designed for talented educators who are passionate about and have demonstrated excellence in teaching, curriculum design, educational practice and innovation, and research capability (in disciplinary and/or education-related research). This newly recruited group of educators are recognised internationally and within the university for their expertise in educational delivery and will support an uplift in the teaching capability and student experience at the University of Sydney.

Successful candidates will join the Sydney Horizon Educators cohort. For further insights into this exciting opportunity, we invite you to watch this [video](#).

The Associate Professor/ Professor in Digital Transformation and AI Management (Education Focused) dedicates most of their contribution to teaching and teaching-related activities (up to 70%), with a minimum of 20% research and 10% governance, service, and engagement. Additionally, they will mentor junior academics, advising on teaching methodologies, education research approaches, publications, and career advancement.

The role will drive pedagogical advancements, requiring commitment to research and scholarship in educational methodologies, technology, and pedagogical approaches within Business Information Systems to deliver high-quality educational experiences and outcomes, especially in our lifelong learning programs. It is geared towards scholars who are deeply engaged with teaching and learning and committed to playing a pivotal role in education leadership. The successful incumbent will participate in communities of practice with other education focused roles in the Discipline, School, and University.
