**Job Description**

Aalto University is where science and art meet technology and business. We shape a sustainable future by making research breakthroughs in and across our disciplines, sparking the game changers of tomorrow and creating novel solutions to major global challenges. Our community is made up of 120 nationalities, 14 000 students, 400 professors and close to 5000 other faculty and staff working on our dynamic campus in Espoo, Greater Helsinki, Finland. Diversity is part of who we are, and we actively work to ensure our community's diversity and inclusiveness. This is why we warmly encourage qualified candidates from all backgrounds to join our community.

The department of Information and Service Management has a strong focus on empirical studies and active cooperation with companies and prestigious universities. Most of our projects have both national and international partners, and the results of our research are targeted at top tier academic journals.

## Lecturer, statistics and business analytics Aalto University

We are now looking for a

Lecturer in statistics and business analytics

The position is a permanent, full-time position. The Aalto lecturer career system consists of four levels and in this recruitment you can be hired as a university teacher, a university lecturer, or a senior university lecturer, depending on your qualifications and experience. Please see more information on the lecturer career system: [url=https://www.aalto.fi/en/teaching-and-learning/lecturer-career-system]https://www.aalto.fi/en/teaching-and-learning/lecturer-career-system. The job is located in Otaniemi on the Aalto University campus.

Your role and goals

The position has an emphasis in statistics and business mathematics, and you will have an independent role in coordinating and organizing teaching of statistics and business mathematics at the BA-level. You are also expected to supervise bachelor and master's thesis in the fields of business analytics and information service management. You may also contribute to the planning and management of courses at the MA-level and will take part in the tutoring of students, curriculum design, development of teaching and in administrative tasks. The language of teaching at the BA-level is mostly in Finnish, whereas most courses at the MA-level are taught in English. Hence, applicants are expected to be fluent in spoken and written Finnish and have high proficiency in English.

The emphasis of the post is on teaching, but the work also includes a research element. Experience in teaching statistics and business analytics in a business school environment will be considered an advantage. The lecturer is expected to conduct research and follow up the development of their own field.

Applicants must possess a Doctorate (or be near completion of a doctoral degree) in a relevant field, e.g., in statistics, mathematics, operations research, management science, or business analytics.

Salary and benefits
