Conduct quantitative data analysis using statistical software (e.g., Stata, R, Python)

- Design and implement causal inference methodologies (e.g., difference-in-differences, instrumental variables, regression discontinuity, matching techniques)
- Evaluate implications of technology adoption (AI systems in healthcare workflows)
- Evaluate implications of policy interventions (labor regulations in supply chains)
- Clean, manage, and structure complex datasets
- Synthesize literature and support manuscript development
- Collaborate on research design, robustness checks, and visualization of results

Job Requirements:

- Bachelor's degree in Supply Chain Management, or a related field
- Experience in programming and econometric analysis
- Proven ability to work independently and collaboratively
- Strong technical writing skills
-
